RPA and AI – The Power of Two

Sarah Burnett
Vice President
Everest Group

RPA and AI are very different types of technologies but when combined, they can help organizations get significantly more value out of automation. In this session, Sarah Burnett, lead automation analyst at Everest Group, will talk about:

- The differences between the two types of technology
- The suitability of the two for automating different types of processes
- How to get started on each and combine the two for end-to-end automation
