

Institute for Robotic Process Automation & AI (IRPA AI) Announces U.S. City Chapters

New York, NY – June 13, 2019 – The Institute for Robotic Process Automation & Artificial Intelligence (IRPA AI) announced today the plan to establish U.S. city chapters, after successfully launching country chapters in Japan, Italy, South Africa, Mexico, United Kingdom, Colombia and Malaysia that have resulted in substantial growth and engagement in these regions.

IRPA AI will provide these U.S. city chapters with the key content, industry research, best practices, networking opportunities and other essential resources and guidance that is necessary to build a successful local ecosystem.

"It has become clear that as technology becomes more advanced and traditional business models become disrupted, relationships are the key differentiator in the marketplace. Within our network of 100k members, across our ecosystems, members have asked us to create regional gatherings and localized micro-networks to build and enhance key relationships, which prompted us to establish U.S. city chapters," said Frank Casale, IRPA AI Founder.

"These localized U.S. city chapters will offer our members a global marketplace experience, while leveraging local partners with subject matter expertise around the regional concerns and nuances of a particular locale and to create a grassroots ecosystem to draw upon for resources," said Daniel Goodstein, IRPA AI President of Media & Events.

We are currently looking for co-chairs of soon-to-be launched U.S. city and global chapters. Co-chairs will get a speaking role and branding opportunities during yearly gatherings, create a rolodex of local relationships and have the opportunity to shape the chapter's direction and focus, while tapping into IRPA AI's expertise, reach and resources.

To learn more about our country or U.S. chapters, visit www.irpaai.com/chapters or download the IRPA AI Chapter Prospectus.

If you're interested in co-chairing a chapter, please contact Daniel Goodstein at Daniel.Goodstein@irpanetwork.com.

About IRPA AI

Founded in 2013, the Institute for Robotic Process Automation and Artificial Intelligence (IRPA AI) is an independent professional association and knowledge forum for the buyers, sellers, influencers and analysts of robotic process automation, cognitive computing and artificial intelligence. Our global network and advisory services offer leading-edge market intelligence,

industry research, sourcing assistance, events as well as offer opportunities to learn and network with stakeholders across service industry functions. Membership in IRPA AI is free. To join and to learn more about IRPA AI please visit: www.irpaai.com.
